WORK EXPERIENCE

King Research

July 2023 - Present

- Working on a mobile app backend with **.Net**, **MongoDb** and **SQL-SERVER** for a trading app where users can make trades, post blogs, get real time notification of their subscribed stock through algorithmic trades.
- Created Push Notification Service using **Firebase** for mobile app to send realtime notification of stock updates to every user.
- Built a CRM for the organisation with **Angular**, **.NET**, **SQL-Server**.
- **Added extra features for the team in CRM e.g., implementing a notification service by establishing a web socket connection using Signal-R .**
- Developed a trading page for the users where they can buy or sell stocks and get analytics on their algorithmic trade performance.
- Made the application performant by implementing different loading strategies and faster requests by using optimised stored procedures practice.

Focus IT Tech Systems

July 2022 - July 2023

- Built a login portal with **MFA** and **T-OTP** using **AWS Amplify** and **Cognito** service for a portal where multiple clients can do file operations in a single AWS account without having to logging in to AWS console.
- Collaborated in a portal to create new UI where multiple clients login and process data and generate reports. Develop new pages using **AG-grid**, **Bootstrap**, **NG-Prime** and **NG-charts**, **Angular Material** and many other third party libraries.
- Created **AWS CodePipeline** for faster and easier deployments.
